Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3632

This is an office action for serial number 10/701,836.

Election/Restrictions

Claims 21, 43, 45, and 46 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on January 30, 2006.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19, 20, 22-29, 34-42, and 44 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiley 5,066,237. Shiley discloses a support part (30 and 36) having a top side (80) and underside (14) defining at least one location hole (see figure 3), fixing pin (110) having a bottom insertion section. In regards to claim 42 the applicant is reminded that the support part is not positively claimed. Shiley can meet the functional

limitations of the claims concerning the gasket and cylinder head of a piston engine therefore, the limitations have been met.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3632

Claims 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiley 5,066,237 in view of Mosquera 5,509,814. Shiley discloses all of the limitations of the claimed invention except for the insertion section is recessed over a section length by a formation of push-in arms.

Mosquera 814 discloses a fixing pin (figure 2) having a bottom insertion section (below 32) having push-in arms (70 and 72), center shank section (between 30 and 32) and a top retaining section (above 40) defining a plurality of retaining teeth (42 and 82-86), longitudinal slot (from bottom portion to upper portion between 72 and 70), and recess (between 70 and 72).

Art Unit: 3632

It would have obvious to one having ordinary skill in the art at the time of the invention to have modified Shiley to have included the push-in arms defined by recesses to the insertion section as taught by Mosquera 814 for the purpose of facilitating insertion of the fixing pin into the locating hole.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art discloses conventional fixing pins.
